physicians in 39 specialties*

There's nothing more personal than your health. And we're here to help. For the sixth consecutive year, we've partnered with Castle Connolly to provide you with the most comprehensive list of South Florida's top physicians. Because if you're anything like us, there's no messing around when it comes pinpointing the best doctors for you and your family.

Also sprinkled in the top docs list are some common medical myths that we've debunked with the help of local experts. Who knew waiting 30 minutes after eating to swim was actually an old wives' tale? We didn't. Find out what other myths are out there.
